Volume 135 1983

Table of Contents

No. 1 1–180 issued on September 1, 1983
No. 2 181–372 issued on September 15, 1983
No. 3 373–616 issued on October 3, 1983

Corrections 615

Nucleic acids, protein synthesis, and molecular genetics

Developmental and evolutionary comparisons of proteins from purified ribosomal subunits in two silkmoths
S. Kouyanou, E. Fragoulis, and F. C. Kafatos 1–8

A novel protein programmed by the mRNA conserved in dry wheat embryos. The principal site of cysteine incorporation during early germination
L. Hanley-Bowdoin and B. G. Lane 9–15

Nucleotide sequence of cloned cDNA coding for honeybee prepromelittin
R. Vlasak, C. Unger-Ullmann, G. Kreil, and A.-M. Frischauf 123–126

The role of protein L16 and its fragments in the peptidyltransferase activity of 50-S ribosomal subunits
T. Maimets, M. Ustav, and R. Villems 127–130

Tissue-specific formation of transcription-initiation complexes at the 5′ end of the mouse β major globin gene
P. Triadou, J.-C. Lelong, F. Gros, and M. Crepin 163–169

Characterization of DNA methyltransferase from bovine thymus cells
H. Sano, H. Noguchi, and R. Sager 181–185

Free messenger ribonucleoprotein complexes of chicken primary muscle cells following modification of protein synthesis by heat-shock treatment
J. Bag 187–196

Nucleotide sequence of the *Escherichia coli pyrE* gene and of the DNA in front of the protein-coding region
P. Poulsen, K. F. Jensen, P. Valentin-Hansen, P. Carlsson, and L. G. Lundberg 223–229

Stereochemistry of the elongation factor Tu · GTP complex
C. M. Leupold, R. S. Goody, and A. Wittinghofer 237–241

DNA-dependent RNA polymerase from the extremely halophilic archaebacterium *Halococcus morrhuae*
J. Madon, U. Leser, and W. Zillig 279–283

Protein synthesis in cells infected with Semliki Forest virus is not controlled by intracellular cation changes
M. A. Gray, K. J. Micklem, and C. A. Pasternak 299–302

Use of inter-proton nuclear Overhauser effects to assign the nuclear magnetic resonance spectra of oligodeoxynucleotide and hybrid duplexes in aqueous solution
D. G. Reid, S. A. Salisbury, T. Brown, D. H. Williams, J. J. Vasseur, B. Rayner, and J.-L. Imbach 307–314

Interaction of platinum compounds with short oligodeoxynucleotides containing guanine and cytosine
A. T. M. Marcelis, J. H. J. Den Hartog, G. A. van der Marel, G. Wille, and J. Reedijk 343–349

Regulation of heat-shock protein synthesis in chicken muscle culture during recovery from heat shock
J. Bag 373–378

Ribosomal subunits and ribosomal proteins of *Tetrahymena thermophila*. Effect of the presence of iodoacetamide during ribosome extraction on the properties of the subunits
B. Pétridou, M. Cuny, M.-F. Guérin, and F. Hayes 425–434

Reactions *in vitro* of the DNA polymerase-primase from *Xenopus laevis* eggs. A role for ATP in chain elongation
H. König, H.-D. Riedel, and R. Knippers 435–442

Chromatin structure in barley nuclei
G. Mithieux and B. Roux 443–447

Isolation and purification of poly(ADP-ribose) glycohydrolase from pig thymus
M. Tavassoli, M. H. Tavassoli, and S. Shall 449–455

Biosynthesis of the ubiquinol-cytochrome *c* reductase complex in yeast. Characterization of precursor forms of the 44-kDa, 40-kDa and 17-kDa subunits and identification of individual messenger RNAs for these and other imported subunits of the complex
A. P. G. M. van Loon, J. Kreike, A. De Ronde, G. T. J. van der Horst S. M. Gasser, and L. A. Grivell 457–463

Cooperative effects in the peptidyltransferase center of *Escherichia coli* ribosomes
S. B. Bourd, M. K. Kukhanova, B. P. Gottikh, and A. A. Krayevsky 465–470

Glutamyl-tRNA synthetases from wheat. Isolation and characterization of three dimeric enzymes
M. H. Ratinaud, J. C. Thomes, and R. Julien 471–477

Dimeric glutamyl-tRNA synthetases from wheat. Kinetic properties and functional structures
J. C. Thomes, M. H. Ratinaud, and R. Julien 479–484

Nucleotide sequence of the lipoamide dehydrogenase gene of *Escherichia coli* K12
P. E. Stephens, H. M. Lewis, M. G. Darlison, and J. R. Guest 519–527

Nucleic acid sequence of the region of the genome encoding capsid protein VP1 of neurovirulent and attenuated type 3 polioviruses
G. Stanway, A. J. Cann, R. Hauptmann, R. C. Mountford, L. D. Clarke, P. Reeve, P. D. Minor, G. C. Schild, and J. W. Almond 529–533

Protein chemistry and structure

Fluorescence energy transfer between the myosin subfragment-1 isoenzymes and F-actin in the absence and presence of nucleotides
H. R. Trayer and I. P. Trayer 47– 59

Molecular properties of 5-aminolevulinic acid dehydratase from *Spinacia oleracea*
W. Liedgens, C. Lütz, and H. A. W. Schneider 75– 79

Primary structure of histone H2A from nucleated erythrocyte of the marine worm *Sipunculus nudus*. Presence of two forms of H2A in the sipunculid chromatin
D. Kmiecik, M. Couppez, D. Belaiche, and P. Sautiere 113–121

Histones from Chinese hamster ovary cells. Multiple modified forms: a quantitative approach
G. Joseph, M. Caizergues-Ferrer, and F. Amalric 143–149

Evidence for preferential proteolytic cleavage of one of the two fibronectin subunits and for immunological localization of a site distinguishing them
T. Vartio, S. Barlati, G. de Petro, V. Miggiano, C. Stähli, B. Takács, and A. Vaheri 203–207

Enzymatic trimethylation of lysine-72 in cytochrome *c*
W. K. Paik, J. Farooqui, A. Gupta, H. T. Smith, and F. Millett 259–262

The quaternary structure of *Escherichia coli* RNA polymerase studied with (scanning) transmission (immuno)electron microscopy
W. Tichelaar, W. G. Schutter, A. C. Arnberg, E. F. J. van Bruggen, and W. Stender 263–269

β-Crystallin: endogenous substrate of lens transglutaminase. Characterization of the acyl-donor site in the βB_p chain
G. A. M. Berbers, H. C. M. Bentlage, A. M. M. Brans, H. Bloemendal, and W. W. de Jong 315–320

The amino acid sequence of cytochrome *c*-556 from *Agrobacterium tumefaciens* strain Apple 185
P. Tempst and J. van Beeumen 321–330

Affinity labelling of the allosteric site of the L-lactate dehydrogenase of *Lactobacillus casei*
R. Hensel, U. Mayr, and C. Woenckhaus 359–365

A ^{1}H-NMR study of isolated domains from human plasminogen. Structural homology between kringles 1 and 4
M. Llinas, A. De Marco, S. M. Hochschwender, and R. A. Laursen 379–391

Distribution of secondary structure along the fibronectin molecule
S. Y. Venyaminov, M. L. Metsis, M. A. Chernousov, and V. E. Koteliansky 485–489

Dogfish insulin. Primary structure, conformation and biological properties of an elasmobranchial insulin
M. Bajaj, T. I. Blundell, J. E. Pitts, S. P. Wood, M. A. Tatnell, S. Falkmer, S. O. Emdin, L. K. Gowan, H. Crow, C. Schwabe, A. Wollmer, and W. Strassburger 535–542

Study of the *Hansenula anomala* yeast flavocytochrome-b_2–cytochrome-*c* complex. 1. Characterization of fluorescent Zn(II)-substituted cytochrome *c*
M.-A. Thomas, V. Favaudon, and F. Pochon 569–576

Study of the *Hansenula anomala* yeast flavocytochrome-b_2–cytochrome-*c* complex. 2. Localization of the main association area
M.-A. Thomas, M. Gervais, V. Favaudon, and P. Valat 577–581

Enzymology

Dephosphorylation and activation of chicken liver acetyl-coenzyme-A carboxylase
K. Wada and T. Tanabe 17– 23

A soluble metalloendopeptidase from rat brain. Purification of the enzyme and determination of specificity with synthetic and natural peptides
M. Orlowski, C. Michaud, and T. G. Chu 81– 88

Change in the reactivity of the active-site serine OH of butyrylcholinesterase caused by a new reversible inhibitor
J. Gaal, F. Bartha, and J. Batke 157–162

Ganglioside biosynthesis in rat liver. Characterization of UDPgalactose–glucosylceramide galactosyltransferase and UDPgalactose–GM_2 galactosyltransferase
H.-J. Senn, M. Wagner, and K. Decker 231–236

Binding of *N*-acetyl-L-glutamate to rat liver carbamoyl phosphate synthetase (ammonia)
E. Alonso and V. Rubio 331–337

On the stability of tetrahedral intermediates within the active sites of serine and cysteine proteases
J. Fastrez 339–341

Peroxidase catalysed aerobic degradation of 5,6,7,8-tetrahydrobiopterin at physiological pH
W. L. F. Armarego, D. Randles, and H. Taguchi 393–403

Studies on the mechanism of action of the histone kinase dependent on adenosine 3',5'-monophosphate. Fast kinetics of histone H1 phosphorylation
A. G. Gabibov, S. N. Kochetkov, L. P. Sashchenko, I. V. Smirnov, and E. S. Severin 491–495

Pig heart nucleosidediphosphate kinase. Phosphorylation and interaction with Cibacron blue 3GA
I. Lascu, R. D. Pop, H. Porumb, E. Presecan, and I. Proinov 497–503

Isolation and comparison of arylsulfatase A from rat liver and Morris hepatoma 7777
G. Hess 505–509

Carbohydrate composition and electrophoretic properties of tomato polygalacturonase isoenzymes
M. Moshrefi and B. S. Luh 511–514

Reaction mechanism of flavin-dependent hydroxylation. Evolution of a non-imitable enzyme
C. M. Visser 543–548

Non-reactivity of the selenoenzyme glutathione peroxidase with enzymatically hydroperoxidized phospholipids
A. Grossmann and A. Wendel 549–552

On the formation of an oxygen-tolerant three-component nitrogenase complex from *Azotobacter vinelandii*
G. Scherings, H. Haaker, H. Wassink, and C. Veeger 591–599

Synthetic peptides reproducing the site phosphorylated by cAMP-dependent protein kinase in protein phosphatase inhibitor-1. Effect of structural modifications on the phosphorylation efficiency
G. Chessa, G. Borin, F. Marchiori, F. Meggio, A. M. Brunati, and L. A. Pinna 609–614

Carbohydrates, lipids and other natural products

The initiation of glycogen biosynthesis in rat heart
M. L. Blumenfeld, W. J. Whelan, and C. R. Krisman 175–179

A novel glycoasparagine isolated from an ovalbumin glycopeptide fraction (GP-IV). Anion-exchange borate chromatography and structural analysis of GP-IV glycoasparagines
H. Nomoto and Y. Inoue 243–250

β-Agarases I and II from *Pseudomonas atlantica*. Purification and some properties
L. M. Morrice, M. W. McLean, F. B. Williamson, and W. F. Long 553–558

Physical biochemistry

The reaction of trout hemoglobins with isocyanides
B. Giardina, G. Falcioni, M. Coletta, and M. Brunori 171–174

A pulse-radiolysis study of the reduction of flavodoxin from *Megasphaera elsdenii* by viologen radicals. A conformational change as a possible regulating mechanism
J. W. van Leeuwen, C. van Dijk, and C. Veeger 601–607

Membranes and bioenergetics

The location of redox-sensitive groups in the carrier protein of proline at the outer and inner surface of the membrane in *Escherichia coli*
B. Poolman, W. N. Konings, and G. T. Robillard 41– 46

Characterization of the cytochromes occurring in *Methanosarcina* species
W. Kühn and G. Gottschalk 89– 94

Heterogeneity of brush-border-membrane vesicles from rat small intestine prepared by a precipitation method using Mg/EGTA
B. Stieger and H. Murer 95–101

Effects of Mn^{2+}, Ca^{2+} and chlorpromazine on photosystem II of *Anacystis nidulans*. An attempt to establish a functional relationship of amino acid oxidase to photosystem II
E. K. Pistorius 217–222

Effect of reduced membrane lipid fluidity on the biosynthesis of lipopolysaccharide of *Escherichia coli*
J. M. Dirienzo and M. Nouye 351–357

Detergent solubilisation of the rabbit neutrophil receptor for chemotactic formyl peptides
J. M. Baldwin, J. P. Bennett, and B. D. Gomperts 515–518

Detection of conformational changes in chloroplast coupling factor 1 by 8-anilino-1-naphthalene-sulphonate fluorescence changes
U. Pick and M. Finel 559–567

Cellular biochemistry and metabolism

Increased methyl esterification of membrane proteins in aged red-blood cells. Preferential esterification of ankyrin and band-4.1 cytoskeletal proteins
P. Galletti, D. Ingrosso, A. Nappi, V. Gragnaniello, A. Iolascon, and L. Pinto 25– 31

Growth and adipose differentiation of sheep preadipocyte fibroblasts in serum-free medium
T. E. Broad and R. G. Ham 33–39

A set of non-histone proteins isolated from the nuclei of various rat tissues
A. Inoue, Y. Higashi, T. Hasuma, S. Morisawa, and M. Yukioka 61– 68

Distribution of enzymes of fatty acid and ketone body metabolism in periportal and perivenous rat-liver tissue
N. R. Katz, W. Fischer, and S. Giffhorn 103–107

Uroporphyrinogen III, an intermediate in the biosynthesis of the nickel-containing factor F_{430} in *Methanobacterium thermoautotrophicum*
H. Gilles and R. K. Thauer 109–112

Phosphorylation of purified bovine cardiac sarcolemma and potassium-stimulated calcium uptake
V. Flockerzi, R. Mewes, P. Ruth, and F. Hofmann 131–142

Short-term regulation of glycolysis by insulin and dexamethasone in cultured rat hepatocytes
I. Probst and K. Jungermann 151–156

Disparate effects of monensin and colchicine on intracellular processing of secretory proteins in cultured rat hepatocytes
K. Oda, Y. Misumi, and Y. Ikehara 209–216

Properties of carbamoyl-phosphate synthetase (ammonia) in rat-liver mitochondria made permeable with toluene
C. Lof, M. Cohen, L. P. Vermeulen, C. W. T. van Roermund, R. J. A. Wanders, and A. J. Meijer 251–258

Synthesis of glycosaminoglycans by cloned bovine endothelial cells cultured on collagen gels
D. J. Winterbourne, A. M. Schor, and J. T. Gallagher 271–277

Hidden receptors for nerve growth factor in PC12 cells
A. Cattaneo, S. Biocca, S. Nasi, and P. Calissano 285–290

Cytoskeleton-associated glycoproteins from chicken sympathetic neurons and chicken embryo brain
D. J. Moss 291–297

Evidence for an alternative and non-phosphorylating pathway for NADH reoxidation in a yeast strain resistant to glucose repression
N. M. Camougrand, R. B. Caubet, and M. G. Guerin 367–371

Short-term modulation of glycogen metabolism, glycolysis and gluconeogenesis by physiological oxygen concentrations in hepatocyte cultures
D. Wölfle, H. Schmidt, and K. Jungermann 405–412

Topography of the total protein population from cultured cells upon fractionation by chemical extractions
J. A. Lenstra and H. Bloemendal 413–423

The effect of quercetin on the phosphorylation activity of the Rous sarcoma virus transforming gene product *in vitro* and *in vivo*
Y. Graziani, E. Erikson, and R. L. Erikson 583–589

Developmental biochemistry and immunology

Developmental changes in poly(A) polymerase activity in *Artemia*
L. Sastre and J. Sebastian 69– 74

Immunochemical properties of the aminopropeptide of procollagen type III
H. Rohde, P. Bruckner, and R. Timpl 197–202

Changes in DNA polymerase α, β, γ activities during early development of the teleost fish *Misgurnus fossilis* (loach)
V. S. Mikhailov and D. B. Gulyamov 303–306
